Compare the measurement (in cm) of the longest part of the foot using the table below:

cross reference this value against the **"SHOE INSIDE LENGTH"**.

Then, from this column, check whether the measured length of the foot is greater than the value of the corresponding **"COMFORT SIZE"**.

If you have from same column **"SHOE INSIDE LENGTH"** < measured length of your foot < **"COMFORT SIZE"** you will have the correct shoe size to order.
